Let's celebrate progress!

OUR COMMUNITY WORKS FOR CHANGE.

THANK YOU FOR YOUR
KIND SUPPORT!

▶ sciontario.org/75

In 1945, our founders returned to Ontario with spinal cord injuries sustained in the war. Finding little support, they **worked to increase access to specialized medical care and mobility devices**. They created the first rehabilitation centre for people with SCI and revolutionized life for those with disabilities.

Today, everyone in our community – newly injured men and women facing intense challenges, and those helping ease that journey – **work to make this province more accessible so all can enjoy full, healthy, independent lives**.

By donating in honour of our 75th anniversary, you help make that important goal a welcome reality.
